5. TEST

Tips:
Now it is time to put your prototype to the TEST! In this phase, you will create a plan for testing your prototype. Think of the Test Phase as a pilot program.

The top three teams may have the chance to work with staff and faculty to implement their solutions.

In the Test Phase, you set standards and measures to test your prototype against. This is an iterative process so often you go back and change your prototype and keep testing it until the project is where you want.

Resources & Evaluation Measures:
1.
2.
3.

Timeline:
4.

Step 5:
Develop a plan to test your prototype:

1. Resources and personnel needed to finish developing your prototype or to test your prototype
2. Measures of success
3. Any anticipated barriers
4. Test Timeline

Project Name:
Innovate Wellness Challenge
